## Goshala Road Development

January 13, 2007

Mayapur management is arranging for the Goshala road to be upgraded to an asphalt (or tarmac) road - after long years of having a rocky mud track, affected by the weather conditions, especially in the rainy season.

January 2007 - the work is going on fast. Workers are carrying the hot tar from the cooking place (by the temple end of the road) to spread all along the path, all the way up to Goshala Grihastha area beyond the Goshala.
